

Acquiring Real-time Air
Quality Information at
your location using
PRAISE-HK Web Service

What is PRAISE-HK?

<http://praise.ust.hk/>

Big Data

Model

Air Quality Info data stored on a Server

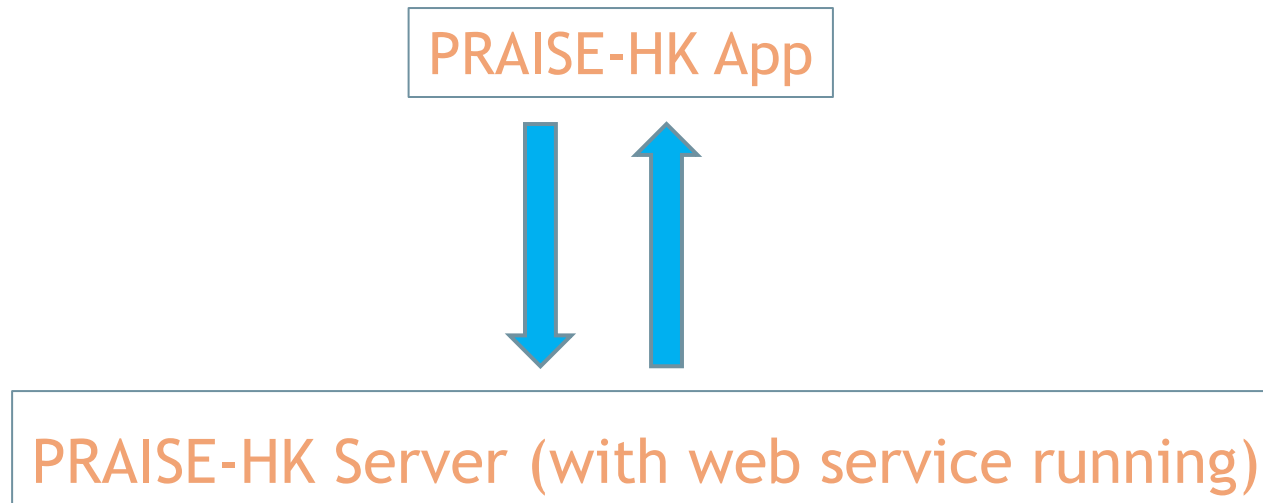

PRAISE-HK air quality information

- High data-density (down to street level)
- High accuracy
- Able to provide 48-hour forecasted air quality information

Air quality information which includes:

1. Air Quality Health Index (AQHI)
2. % added short-term health risk (%AR)
3. Concentration of air pollutants - Nitrogen Dioxide (NO₂), Ozone (O₃), Respirable Suspended Particulates (PM₁₀), Fine suspended particulates (PM_{2.5}), and Sulphur Dioxide (SO₂)

How to access Air Quality Info on the PRAISE-HK Server?

What is Web Service?

- A service offered by an electronic device to another electronic device, communicating with each other via the Web.
- Similar to communication between human (that using a web browser) and a web server.

How to access the PRAISE-HK Web Service?

Use an Application Programming Interface (API)

e.g. https://praise-web.ust.hk/uwsgi/praise-service/?todo=get_data&lng=114.155780&lat=22.338711&...

The URL is long....(*actually very long!!*):

1. Difficult to remember
2. Clumsy to input

Solution...

“PRAISE_HK_web” extension 

With it, just need to provide some critical parameters:

But what is *extension*?

<http://ai2.appinventor.mit.edu/reference/other/extensions.html>

Workflow
